Fall 2023 Prime Time Program

Wow! What a busy fall semester in Prime Time! The last day of the fall semester was November 21st, 2023. This semester was full of learning, fun, and growing friendships.

The school age groups played board games, built marshmallow towers, painted pumpkins, and made cupcakes. They also learned about humor and how to make friends during their weekly pragmatic language lessons. In addition, the dental hygiene college students visited on four Thursdays this semester in which they presented lessons about the importance of good hygiene to the high support school age group.

The adult group enjoyed making homemade snacks every week as well as participating in a pragmatic language lesson using an AAC iPad device. Last, but not least, Prime Time added an adolescent girls group this semester meeting once a month. This was a pilot project in order to gauge interest with this specific population.

We are already so excited to begin the after-school programming for the spring 2024 semester during the last week of January. See you then!
