*Subject to change as necessary

**Winter break and summer activities will differ as client flow changes during these times of the academic year. Interns typically experience a decrease in clinical activities, and an increase in administrative and/or didactic activities during these periods of time.

The work week at WKU is 37.5 hours. However, in order for interns to meet the requirements of internship with 500 direct hours and 2,000 hours overall interns do have to work more than 37.5 hours per week.
