At the last AD meeting on May 15, we discussed the following:

1. Reviewed critical path doc regarding IT Div migration to AD.

http://docs.google.com/Present?revision=_latest&fs=true&docID=dc5gk2g6_26d5vxt4cc

2. Goal is to basically migrate IT Div by end of June 08.

3. Reviewed the "Timeline" in the critical path doc which identifies dates we need to hit to accomplish a June migration of IT. See link above, page two.

Next Meeting, Thurs May 22

1. Look at updates to End user accounts and logins management pages, discuss any issues anybody has found with functionality. <http://www.wku.edu/infotech/index.php?page=696>
2. Look at updates to PW Mgmnt App and support of NetID/LDAP/
3. Look at specifications for AD management tools needed by HD and Desktop. (Jeppie and Charles and Brad were going to put together a list of essential features needed for AD support by HD). Brent take these and evaluate against tool options.
4. See where stand on Migration Plan.
5. Training -- Kurt bring us up to date on what he had discussed with Shawn since last meeting.
6. Other logistics.
