

**GEOG 316**  
**Fundamentals of GIS**  
**Class Assignments Week 4**

**Part 1: Web Tutorials – Due Monday, 9/22/2008**

Lesson 7: Answer questions 1-3

Lesson 7a: Answer questions 1, 2, 4

Lesson 8b: Answer questions 1-4

Lesson 8c: Answer questions 1-3

Lesson 12:: Answer questions 1-3

Put all of the answers from the html tutorial either as an html file, a word document or a PDF and put a link on your page to that document.

**Part 2. Changes to your webpage: Due Monday, 9/22/2008**

Find a graphic to your liking (or make one) and post it on your index page. Be sure to cite the source of your graphic with a line underneath it.

Put a live link to your email address at the bottom of your page.

**Part 3: GIS databases and data models: Due posted on your website by Tuesday, 9/23/2008**

Add a page (or file either pdf or word doc) to your website that contains the following information:

Define the following:

What is a Spatial database (show an example)

What is an Attribute databse (show an example)

Compare and contrast the properties of Raster graphics vs. Vector graphics. Show an example of each.

You can use your book and/or the Internet to find this information. Please cite your sources.

**Part 4: In class lab exercises Due Friday 9/19/2008**

Part 4: In-class lab ((9/15/2008) SEE ME IF YOU HAVE VERSION 3 OF THE BOOK

Read Chapter 2 p. 63-74. Answer questions 1-10 in a word document and post on your website.

Inclass lab 9/17/2008: p. 76-79 – fill in blanks 1-10. Put in a work document and post on your website.
