

Contents

Chapter 1

Biomembrane Structure and Dynamics Viewed by Fluorescence

B. Wieb Van der Meer

1. Introduction to Fluorescence	1
2. Dynamics and Structure of Membranes	4
2.1. Lateral and Rotational Diffusion	5
2.2. Orientational Order and Packing	7
2.3. Asymmetry	9
2.4. Lipid Domains	10
3. Fluorescence Techniques and What They Make Visible	10
3.1. Fluorescence Depolarization	11
3.2. Quenching	26
3.3. Fluorescence Energy Transfer	28
3.4. Fluorescence Recovery after Photobleaching (FRAP)	35
3.5. Excimer Fluorescence	38
4. Summary and Conclusions	41
5. References	42

Chapter 2

Dynamic Structure of Membranes and Subcellular Components Revealed by Optical Anisotropy Decay Methods

Kazuhiko Kinosita, Jr., and Akira Ikegami

1. Introduction	55
2. Optical Anisotropy Decay	56
2.1. Principle of Optical Anisotropy Decay Method	56
2.2. Experimental Techniques	59
2.3. Information Contained in an Anisotropy Decay	63
