

PHYSICAL ASPECTS OF MEMBRANE FLUIDITY

Wieb van der Meer

TABLE OF CONTENTS

I.	Introduction	54
II.	Fluidity-Related Parameters	54
	A. Diffusion	54
	B. Order	55
	C. Packing	57
	D. Permeability	57
III.	Relations Between Fluidity Parameters	57
	A. Diffusion — Model Viscosity	58
	B. Order — Model Viscosity	59
	C. Diffusion — Order	59
	D. Order — Permeability	60
	E. Order — Packing	60
IV.	Molecular Shape and Forms of Organization	63
	A. Polymorphism in Lipid-Water Systems	63
	B. Phase Transitions	64
V.	The Protein Position	66
	A. Analogy to the Law of Archimedes	66
	B. The Gerson Model	67
	C. Curvature Changes	68
VI.	Conclusion	68
	Acknowledgments	68
	References	69
