	nmary (Briefly summarize the action and follow up items from your detailed responses on subsequent pages.)		
	Its from this assessment indicate that the program success target percentages are being reached and/or exceeded the self-reported asse		
	ng Outcome 1: Continued to stress to all students the importance of studying ahead of time for the NBDHE. Discussed that each		
	g with a concept or understanding material. Recommended the opportunity to attend national board review courses, provided inform		
	position online board review course, and suggested study materials outside of course material provided by instructors. Discussed		
provided test tak	ing approaches for those students who struggle with exams. These items were encouraged throughout matriculation through the p	orogram. All I	bs students w

attempted the NBDHE on a second attempt passed except for one student increasing the pass rate of students who pursued the BS degree to 95.24%. During the first attempt, one student stated the testing environment was not organized and was offered a retake by the testing agency.

Student Learning Outcome 2: Each student's progress is tracked by monitoring process evaluations, assignments, competencies, and clinical patient requirements. Students are expected to demonstrate steady competency progression throughout each semester while also completing all requirements within a timely manner. The faculty may require any student who is not demonstrating adequate progression at a competency level or struggling with certain material or clinical aspect to seek remediation during the open clinical lab sessions on Fridays or work with an individual instructor pertaining to clinical issues. Faculty also relay information to the Program Director when a student is having difficulty meeting parameters and a meeting with the student could be provided to discuss possible approaches to help the student be successful. Faculty will continue to emphasize outside of class assistance via instructor or remediation sessions as well as encourage students to recruit patients to satisfy specific requirements if needed. Students continue to complete all clinical requirements in a timely manner. Updated graduate surveys for the upcoming graduating class will be evaluated and compared to previous classes once completed in May.

Student Learning Outcome 3: Students are provided daily, weekly, and routine feedback from laboratory, preclinical, and clinical performance with instructor comments on evaluation forms. Students are expected to demonstrate steady competency progression throughout each semester while also completing all requirements within a timely manner. The faculty may require any student who is not demonstrating adequate progression at a competency level or struggling with certain material or clinical aspect to seek remediation during the open clinical lab sessions on Fridays or work with an individual instructor pertaining to clinical issues. Faculty also relay information to the Program Director when a student is having difficulty meeting parameters and a meeting with the student could be provided to discuss possible approaches to help the student be successful. Dental hygiene graduates appear to be able to perform self-assessment to maintain professional standards and encourage life-long learning. Surveys from the upcoming graduating class will be compared to recent graduates. Students will continued to be individually monitored by faculty during their matriculation through the program. Any student recognized by faculty who may be struggling with a specific concept will be assisted by an instructor and referred to mandatory remediation as needed.

Measurement Instrument 1	patient treated of study patient in and dental philo patient to detern narrative descri presentation inco periodontal recy Point. Students	irect measure of student learning: Students in Dental Hygiene 371 Clinical Dental Hygiene III provide a presentation of a case study attent treated during the previous semester in Dental Hygiene 370 Clinical Dental Hygiene II. Material considered when selecting the case addy patient include: reason for choosing the patient, background of the patient, personal social history relevant to the patient's dental health ad dental philosophy needs, summary of dietary analysis and recommendations made to the patient, and a periodontal reevaluation of the attent to determine if the patient benefited from the therapy provided by the student. The oral presentation is provided in the form of a urrative describing the patient's chief complaint, results of the examination, treatment plan, therapy, and results of therapy. The essentation includes radiographic images and clinical intraoral photographs. Postoperative photos are taken at the beginning of the periodontal reevaluation appointment. The case study patient information is presented in an oral format in class using Microsoft Power bint. Students are evaluated on the ability to analyze these factors and link the concepts to approaches that will be used on a routine basis in e clinical practice setting.								
Criteria for Student Success		be able to satisfy the completion of the case prese

Methods Measurement Instrument 3	entire exam as y score and indivi- national averag of a high degree had a 95.24% p	Results for each student are provided from the NBDHE to the program director. A collective student breakdown of the average score of the entire exam as well as the average score for each subject section of the exam is provided to the program director. The average overall exam score and individual average subject scores for the students who attempted the exam (BS and AS) for this cycle (26) were at or above the national average. These values suggest the program is meeting the goal of providing an academic atmosphere conducive to the development of a high degree of dental hygiene knowledge and clinical skill. Upon exam retakes for those students pursuing the BS degree, the program had a 95.24% pass rate.								
measurement Instrument 3	Indirect measure of student learning: Data from employer surveys will demonstrate at least 90% agreement that graduates meet program									

	outcome.	utcome.									
Criteria for Student Success	Employer feedback should indicate that a dental hygiene graduate is well prepared or prepared in various aspects associated with the dental hygiene process of care.										
Program Success Target for thi	100%										
MethodsThe program systematically gathers and incorporates feedback regarding the needs and satisfaction of employers. Employee surveys are delivered to various offices every two years. Various aspects of dental hygiene program graduates evaluated by employers in the survey included: Ethics and Critical Thinking, Health Promotion and Disease Prevention, Patient Care, Planning, Implementation, and Evaluation. Results from the most recent employer survey taking place between 2018-2019 indicated that 100% of employers who answered the survey believed their Western Kentucky University dental hygiene graduate was either "well-prepared" or "prepared" to meet the identified objectives. Additionally, 100% of employers were either "very satisfied" or "satisfied" with their Western Kentucky University dental hygiene graduate. The findings and conclusions indicate program goals are being met based upon the response of employers.MetNot Met

MethodsStudent exit surveys are provided the last week of classes before graduation. The goals of the program are listed with descriptions under each asking the student if they feel well prepared, prepared, not prepared, or do not know in relation to various components of these goals. Surveys were provided with all BS and AS students (26) earning degrees responding. One goal listed that correlated with the student learning outcome was does the program prepare dental hygienists who possess the reasoning, judgment and leadership skills necessary to identify problems, develop solutions to problems, implement these solutions, and evaluate the effectiveness of these solutions through formulating a dental hygiene assessment and developing a treatment plan. Nineteen of the respondents felt well prepared with seven indicating they felt prepared. Another goal related to this student learning outcome was does the program prepare dental hygienists who ca function in the increasingly complex, interdisciplinary healthcare system and who are able to meet the dental hygiene care needs of the elderly, culturally diverse, disadvantaged, and physically challenged. Twenty respondents stated they felt well prepared and six stated they

Actions (Describe the decision-making process and actions planned for program improvement. The actions should include a timeline.) Each student's progress is tracked by monitoring process evaluations, assignments, competencies, and clinical patient requirements. Expectations are explained to the student in the Dental Hygiene Manual and also discussed in all laboratory and clinical syllabi. Clinical coordinators keep records of student progression and routinely review these items while also providing the student opportunities to review this information throughout each semester. Students are provided daily, weekly, and routine feedback from laboratory, preclinical, and clinical performance with instructor comments on evaluation forms, assignments, competencies, and clinical evaluation forms. Students are expected to demonstrate steady competency progression throughout each semester while also completing all requirements within a timely manner. The faculty may require any student who is not demonstrating adequate progression at a competency level or struggling with certain material or clinical aspect to seek remediation during the open clinical lab sessions on Fridays or work with an individual instructor pertaining to clinical issues. Faculty also relay information to the Program Director when a student is having difficulty meeting parameters and a meeting with the student could be provided to discuss possible approaches to help the student be successful. Faculty will continue to emphasize outside of class assistance via instructor or remediation sessions as well as encourage students to recruit patients to satisfy specific requirements if needed.

Western Kentucky University Program of Dental Hygiene Employer Evaluation 2019

1) Year your dental hygienist graduated from WKU's Program of Dental Hygiene

2) Please place an 'X' in the column that best describes the degree to which you feel your WKU dental hygienist was prepared to meet the following:

		Well Prepared	Prepared	Not Prepared	Do Not Know
Sec	tion 1: Ethics and Critical Thinking				
1	Apply ethical reasoning to dental hygiene practice				
2	Serve all clients in the community without discrimination				
3	Provide humane and compassionate care to all clients				
4	Maintain honesty in relationships with patients, colleagues, and other professionals				
5	Ensure the privacy of the patient during treatment and confidentiality of patient records				
6	Adhere to state and federal laws governing the practice of dental hygiene				
7	Solve problems and make decisions based on accepted scientific principles				
8	Analyze published reports of oral health research and apply this information to the practice of dental hygiene				
9	Evaluate safety and efficacy of oral health products and treatment				
10	Communicate professional knowledge verbally and in writing to patients, colleagues, and other professionals				
Sec	tion 2: Health Promotion and Disease Prevention				
1	Promote oral and general health and wellness to patients				
2	Identify the oral health needs of individuals and assist them in the development of individualized self-care regimens				
3	Evaluate factors that can be used to promote patient health maintenance strategies				
4	Evaluate and utilize methods to ensure the health and safety of the patient				

		Well Prepared	Prepared	Not Prepared	Do Not Know
		ll P	par	Pr	No
		ref	ed	epa	t K
		oare		tree	no
		ed		<u> </u>	W
Sec	tion 3: Patient Care				
1	Obtain, review, and update vital signs, medical, family, social, and				
	dental histories				
2	Manage the patient chart as a legal document and maintain its				
	accuracy				
3	Determine medical conditions that require special precautions or				
	consideration prior to or doing treatment				
4	Identify the patient at risk for a medical emergency and manage				
	patient care to prevent emergencies				
5	Perform a comprehensive exam using clinical, radiographic,				
	periodontal, dental charting, and other data collection procedures				
	to assess patient needs				
Sec	tion 4: Planning				
1	Determine priorities and establish oral health goals with the				
	patient/guardian as an active participant				
2	Establish a planned sequence of educational and clinical services				
	based on the dental hygiene diagnosis				
3	Obtain the patient's informed consent based on a thorough case				
	presentation				
4	Make appropriate referrals to other health care professionals				
Sec	tion 5: Implementation				
1	Use accepted infection control procedures				
2	Obtain diagnostic radiographs				
3	Provide an environment conducive to health by applying basic and				
	advanced principles of dental hygiene instrumentation				
4	Control pain and anxiety during treatment through the use of				
	accepted clinical and behavior management strategies				
5	Provide adjunct dental hygiene services that can be legally				
	performed in the state				
	tion 6: Evaluation			T	
1	Determine the clinical outcomes of dental hygiene interventions				
	using indices, instruments, and examination techniques				
2	Determine appropriate maintenance schedule (recall) for patients				
3	Provide subsequent treatment or referrals based on evaluation				
L	findings				
4	Develop and maintain a health maintenance program				

Please circle the number corresponding to your overall satisfaction with your Western Kentucky University Dental Hygiene graduate.

3-Extremely Satisfied2-Satisfied1-Not Satisfied

If there are any skills that you feel should be included that were not evaluated, please list them below.

BITEWING RADIOGRAPHIC EVALUATION

Student:_____

Instructor: Date:			
Criteria:	SE	IE	IR
1. *Wears film badge			
2. *Wears gloves, mask, glasses and appropriate attire			
3. *Determines need for two or four bitewing radiographs			
4. *Explains the necessity of radiographs and procedure to patient			
5. *Prepares operatory prior to radiographic procedures			
6. *Selects appropriate film size for exposure			
7. *Selects appropriate technique			
 *Prepares film so that exposure side of the film packet is adjacent to the bite-tab on the film holding device 			
9. *Uses disinfected/sterilized or disposable film holding device			
10. *Prepares the patient for radiographic exposure by:			
a. removing eyeglasses and removable dental appliances			
b. draping with lead apron			
c. applying thyroid collar			
11. *Properly positions the patient for exposure:			
a. midline is perpendicular to the plane of the floor			
b. occlusal plane in the mouth closed position is parallel with the plane of the floor			
 *Selects correct kVp, mA, and time settings for each exposure prior to placement of film packet in patient's mouth 			
13. Closes all doors labeled "Close Door During X-Ray Procedures."			
14. *Demonstrates correct placement of the film packet for exposure:			
a. positions the lower half of the film packet so the bite tab rests on the occlusal surface of the mandibular teeth			
b. stabilizes the bite tab while the patient is instructed to close slowly			
c. checks to be sure the packet is not dislodged			
d. premolar exposures the film packet is centered in the premolar area			
15. *Determines correct horizontal angulation to avoid overlapping			
16. *Determines correct vertical angulation to avoid elongation or foreshortening (uses			

approximately 5 to 10 positive angulation)

Γ

Criteria:	SE	IE	IR
17. *Determines correct PID placement to avoid cone-cutting			
18. *Leaves the room during radiographic exposure			
19. *Presses exposure button for complete exposure cycle			
20. *Places exposed film in designated container in preparation for processing			
21. *Sanitizes operatory and processes film holding device in appropriate manner			
22. *Leaves equipment in proper position			
23. *Processes film			

T

* Critical item. Must reevaluate if missed.

SE = Self Evaluation

IE = Instructor Evaluation

IR = Instructor Reevaluation

Student (Exit) Survey 2019 With respect to your Dental Hygiene Education at WKU, please answer the following questions:

Student (Exit) Survey 2019 (cont).

		Well Prepared	Prepared	Not Prepared	Do Not Know	
Go	al #3 Prepare individuals who are capable of meeting the needs of soc	ciety,	denti	stry,		
and	l dental hygiene now and in the future.					
1	Work effectively to solve problems, make decisions, and support					
-	members of the dental team					
2	Implement emerging technology in dental hygiene practice					
	al #4 Prepare dental hygienists who are literate, capable of problem-s	solvin	ıg, de	cisior	1	
	king, and motivated to be life-long learners.					
1	Effectively evaluate dental literature					
2	Stay current using evidence-based decision making					
	al #5 Prepare dental hygienists who possess the reasoning, judgment,					
	lls necessary to identify problems, develop solutions to problems, impl	lemer	nt the	se		
sol	utions, and evaluate the effectiveness of these solutions.					
1	Formulate a dental hygiene assessment and develop a treatment plan					
Go	al #6 Prepare dental hygienists who can function in the increasingly o	comp	lex,			
inte	erdisciplinary health care system and who are able to meet the dental	hygie	ene ca	re ne	eeds	
of t	he elderly, culturally diverse, disadvantaged, and physically challenge	ed.				
1	Effectively communicate with, educate, and treat all patients from a					
	wide variety of backgrounds					
Go	al #7 Prepare dental hygienists who possess the moral and ethical val	ues r	equisi	ite fo	r	
	effective performance of responsibilities within dental hygiene, dentis					
1	Display professional and ethical conduct					
2	Establish good rapport and a caring attitude towards patients					
Goal #8 Prepare dental hygienists who are committed to contributing actively to the						
betterment of the profession through professional involvement and continued education.						
1	Communicate effectively with patients and other health professionals					
2	Select and attend continuing education courses that increase					
_	knowledge and skills for better patient treatment					
3	Be actively involved in your professional organization					

What areas can be improved upon?
