

AOL Meeting March 21, 2014

Present: Gardner, Spiller & Blankenship.

Undergraduate Activity

The Strategic / Critical thinking results was returned to the committee for review and discussion. The average results were as follows:

Identify Problems 3.42/5

Considers Key Assumptions 3/27/5

Analyzes Supporting Evidence 3.3 /5

Assess Conclusions and Implications 3.08/5

The committee had some concern with the last measure of Assess Conclusions and Implications. The recommendations are to meet with the management professor and discuss the case and rubric with them to identify areas where the score can be improved.

The next set of evaluations will be for undergraduate oral presentations. Also the graduate strategic/critical thinking results will be evaluated for the PMBA and face-to-face MBA.
