

What You Can Expect from the Student Success Center

- A quiet place where you can study and access tutors who do not have individual appointments already scheduled.
- A place where your study group can come to work with a tutor.
- A quiet meeting place for your study group.
- Qualified tutors who have an A in the courses they tutor.
- The tutoring center is a place to foster learning. Civility is a must for collaboration.
- We limit students to one tutoring session per day per class. For example, a student may only schedule one tutoring session for their ACCT200 course, but may schedule another session later in the day for their Econ206 course. Students may NOT schedule back to back appointments or two appointments for the same class in one day. The reason for this is that only so much information can be absorbed and retained, so scheduling two back to back sessions for the same subject is futile.
- We encourage students to work with the tutor for 1 hour, take a short break and then continue to work independently on what was covered during the tutoring session.
