# VEGAN/VEGETARIAN GUIDE

Vegetarian foods are a major source of nutrition for most people in the world. Some people like to limit their diet to only foods that are considered vegetarian. A healthy vegetarian diet is typically low in fat and high in fiber. However, even a vegetarian diet can be high in fat if it includes excessive amounts of fatty snack foods, fried foods and whole milk dairy products. Therefore vegetarian diets, as any healthy diet, must be well planned to help prevent and treat certain diseases.

This guide was created by our Registered Dietitian Nutritionists and is a quick, easy way to find the vegetarian and vegan options at the dining locations of the WKU Restaurant Group. Food options in the Fresh Food Company and in Hilltopper Hub change each meal, every day. For this reason, we recommend talking with one of our chefs or managers should you need help in determining if a menu item is vegan or vegetarian.

## IN GENERAL:

Remember: all vegan items are vegetarian, but not all vegetarian items are vegan.

All items cooked in grease or oil may have risk of cross contamination with meat or dairy containing products.

Please be observant of the vegan or vegetarian options that are noted on the various restaurant menus

If you would like to know the nutritional information of the restaurants on campus please visit <https://www.wku.edu/wkurg/>
