KENTUCKY EPSB NEW TEACHER SURVEY (SPRING 2018)

| Introduction | Responses to Effectiveness Questions | Student Teachers and Interns Certifications | Student Teachers and Interns Most Recent Degree | Grade Level Student Teachers and Interns Currently Teach | Grade Level Student Teachers and Interns Prepared to Teach |

NEW TEACHER SURVEY

The Kentucky Education Professional Standards Board (EPSB) New Teacher Survey is administered every other year to gather data about the perception of the quality of educator preparation programs (EPP) in Kentucky and to gauge attitudes towards institutional training. The survey is administered to KTIP Interns and their resource teachers and building principals as well as Student Teachers and their Cooperating Teachers and building principals. The 2017-18 survey was administered in March 2018 and included the cohort of KTIP interns who began their year-long internship in fall 2017 and were finishing up in the spring. It also included the cohort of student teachers who began in their assignments in spring 2018. Because of apparent inaccuracies in the reporting of some descriptions related to student teacher/KTIP interns placements and subjects taught, we report results only for broad categories of teacher practice (elementary, middle, or secondary). The survey will correct this problem in subsequent years.

The survey was redesigned for 2017-18 to decrease the number of questions for respondents and expand the rating scale. The number of questions decreased from 54 to 13 and the current scale is a 10 point scale instead of the previous 4 point scale. The response rate for each cohort was:

KTIP Intern: 27%
KTIP Resource Teacher: 26%
Student Teacher: 4%
Cooperating Teacher for the student teacher: 29%
Principal for interns and student teachers: 15%

This data visualization project was created using EPSB New Teacher Survey data and Tableau. Click the logo above for the Technical Notes and Walkthrough.
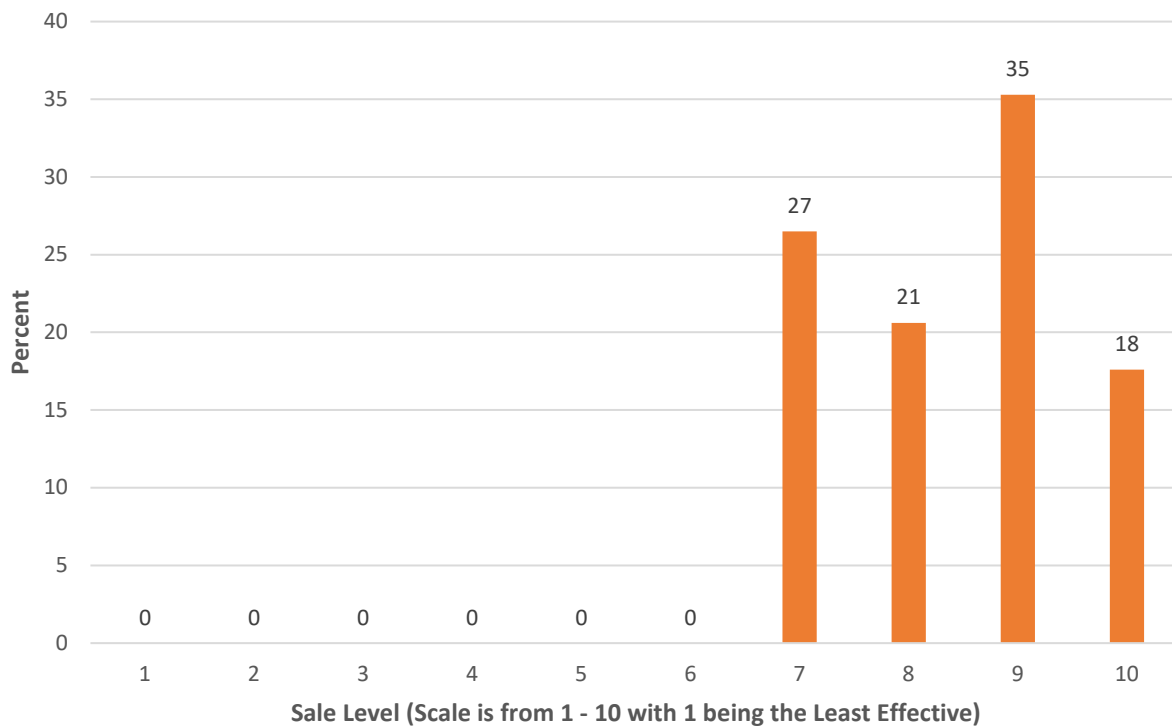

Results for Western Kentucky University
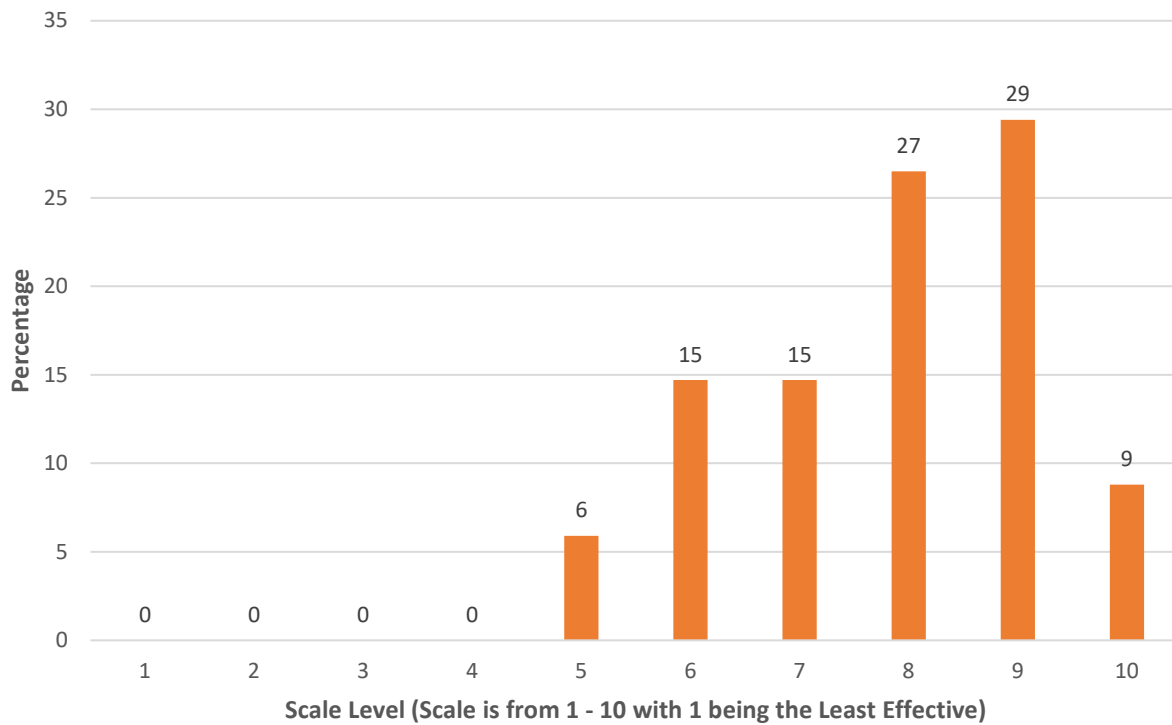

Respondent Types (N = 34):
- **Principals**

How effective was the educator preparation program in preparing the Student Teacher or Intern to work with parents or other outside persons?

Percent
