[1] Other elective courses may be chosen with advisor approval.	

4.   Rationale: To facilitate online access to the certificate the required courses must be regularly offered online or have been developed on Blackboard. Two of the current courses in the core, EHS 572 and PH 530, are not conducive to distant learning. A primary requirement of EHS 572 is the use of SAS to conduct epidemiological statistical analysis. Students at a distance have limited access to the software and the course has not been developed into an online format. When the certificate was developed the faculty had intended that students conduct independent projects through PH 530 – Independent Investigations. However, this has proved to be extremely difficult for students and faculty, as administration of independent projects from a distance has not allowed adequate mentoring and supervision. Therefore, the core courses have been changed to those that have been offered online and greater flexibility is built into the certificate to allow six hours of online electives to be selected by the student with advisor approval.

Overview The WKU Doctorate of Nursing Practice (DNP) program is a practice focused degree preparing advanced practice nurses to assume leadership roles in healthcare. The curriculum, based on a scientific foundation for advanced practice, is designed to emphasize evidence-based practice, leadership, health policy development, and organizational analysis and change. The Post-MSN and the BSN to DNP options are available. Students completing the BSN-DNP option have a Family Nurse Practitioner (FNP) specialization and are eligible to sit for national board certification as an FNP. Both options complete a practice immersion experience and culminating DNP Project. 4. **Rationale: Currently the MSN program has a nurse administrator concentration and** the creation of a Nurse Executive concentration in the BSN-DNP provides a pathway for baccalaureate prepared nurses to pursue the DNP. This degree will prepare our graduates to influence health care outcomes for individuals or populations, includes the administration of nursing and health care organizations, and the development and implementation of health policy.
