

My name is Jamie Daniels, and I am a technical applications recruiter with TEKsystems, in Louisville, KY. I primarily wanted to network with you. Being a graduate of WKU in spring of 2014 with my bachelor's degree in interdisciplinary studies. I am very prideful of the talent that Western has. I am reaching out to you because I have a 3 month (summer job) position available there in Bowling Green, and of course I thought of my Hilltopper family first.

The details of the job are as followed:

Our client is going through a reorganization and is looking for a 3 month contractor to help them stay afloat with some of their marketing tasks until it is designated to a particular group. The applicant will need to have experience working with HTML, CSS and Photoshop. They will be creating marketing emails to be sent out to 100,000 customers multiple times a week. They will need to know how to rip files from Photoshop into HTML. They will also run multiple test emails before actually sending them out. If someone had experience working with an "email client" such as outlook, gmail or exacttarget that would be a plus.

If you know of any student that would benefit from this opportunity; please feel free to give them my contact information. I can be reached any time of day. To add the student can be a current, someone who is about to graduate, or going into the 2nd year in school. They just have to be able to show that they can do the task.

Best regards
