Dr. Revels,

We are in the process of trying to find a Computer Information Technology/ Computer Science Teacher for the 2016-2017 school year.   If you have any students or know anyone that may be interested in teaching full time at the high school level, can you have them get in touch with me.

Here is the teaching schedule that is attached to this position:

2 Computer Science Software Classes through the Project Lead The Way Initiative/ that also will allow students to earn AP credit.
2 Digital Literacy Classes
& 1 Hardware/Software Maintenance Class.

The following year, we hope to add on Helpdesk as a class for students, so they can help teachers address technical issues.

Thanks for your time and I look forward to hear from you if you have any questions.
