

SEEKING MIDDLE SCHOOL SCIENCE TEACHERS WHO:

- ▲ *enjoy the creativity in teaching*
- ▲ *are eager to share ideas with colleagues*
- ▲ *are excited about networking with peers from across the country*
- ▲ *would like financial and academic support for great ideas*

ABOUT THE NATIONAL STEM SCHOLAR PROGRAM:

When you become a 2019 National STEM Scholar, you'll be inspired, encouraged, and empowered to grow your students and yourself. Led by skilled science educators, the Scholar experience fosters new ideas and approaches to teaching, provides a national network of colleagues for career-long interaction, and creates unique access to national thought leaders in education who participate in the program and choose to stay engaged.

This prestigious program is hosted and coordinated by The Gatton Academy of Mathematics and Science and The Center for Gifted Studies at Western Kentucky University (WKU). The ten Scholars selected for the 2019 class will convene June 2-8, 2019 on WKU's campus in Bowling Green, Kentucky.

National STEM Scholars will receive a stipend for technology and supplies necessary to complete a Challenge Project for classroom implementation, a tablet to facilitate communication between colleagues, and sponsored attendance at the 2020 NSTA National Conference in Boston. Mentoring will be provided throughout the year by WKU faculty.

▲ HOW TO APPLY:

Complete the application at <http://www.wku.edu/gifted/nss>.
The deadline to apply is February 1, 2019.
