The definition of surgical procedure requires cutting into the skin or other organ; however, if the covered person requires a procedure listed in the examples for Tier 1 and Tier 2 Outpatient Surgical Procedures we will pay this benefit. We will not pay this benefit for a procedure that is not listed in the examples for Tier 1 and Tier 2 Outpatient Surgical Procedures unless it meets the definition of a surgical procedure, including the requirement for cutting into the skin or other organ.

We will pay the amount shown on the Certificate Schedule per covered outpatient surgical procedure up to the calendar year maximum per covered person shown on the Certificate Schedule. We will pay this benefit for only one outpatient surgical procedure performed at the same time even if caused by more than one accident or sickness. In that event, we will pay the benefit that has the highest dollar value. The Surgical Procedure must occur while the certificate is in force.

To determine the amount payable for an outpatient surgical procedure, locate the procedure in one of the tiers shown in the Outpatient Surgical Schedule below and refer to the benefit amount on the Certificate Schedule for the tier in which the procedure appears.

If the specific procedure that otherwise meets the requirements for an Outpatient Surgical Procedure Benefit is not listed in the Surgical Schedule, we will use the Current Procedural Terminology (CPT) Code provided by the covered person’s doctor and a current relative value scale to determine the tier of the procedure.

We will pay for only one surgical procedure for the same covered accident or covered sickness in a 90-day time period. If a covered person receives a subsequent surgical procedure for the same covered accident or same covered sickness, we will pay an additional benefit only if the subsequent procedure was performed more than 90 days after the last covered procedure was performed up to the calendar year maximum per covered person shown on the Certificate Schedule.
