EDUCATION

University of Georgia, Athens, Georgia

Doctor of Philosophy, Kinesiology, August 2007
Dissertation title: The effect of in-flight perturbations on landing biomechanics

University of Georgia, Athens, Georgia

Master of Education, Exercise Science, August 2002

Georgia Southwestern State University, Americus, Georgia

Bachelor of Science in Education, Exercise Science/Wellness, December 1999

PROFESSIONAL POSITIONS

Teaching Experience

Western Kentucky University College of Health and Human Services, Western Kentucky University: 2007-present

Assistant Professor:

EXS 296: Practicum in Exercise Science
EXS 313: Motor Learning and Control
EXS 436: Foundations of Strength and Conditioning
EXS 446: Biomechanics
EXS 496: Internship in Exercise Science
PE 100: Lifetime Fitness/Wellness
PE 310: Kinesiology
KIN 503: Advanced Motor Learning
KIN 524: Applied Biomechanics

University of Georgia College of Education, University of Georgia: 2001-2006

Course Instructor: EXRS 3600: Introduction to Applied Biomechanics

Responsibilities: Develop course syllabi and content, conduct lectures, supervise development of research questions for term project, supervise qualitative analyses

Course Instructor: EXRS 4200L/6200L: Biomechanics Laboratory

Responsibilities: Develop and implement course syllabi, conduct lectures, develop instructions for using biomechanical methodologies, supervise development of research questions for term project, supervise quantitative analyses.

Research Experience

Biomechanics Laboratory, Western Kentucky University, Bowling Green, Kentucky: 2007-present

Biomechanics Laboratory Director: Responsible for overseeing all activities and projects occurring in the biomechanics laboratory. Responsible for biomechanical equipment maintenance, inventory, and supplies, and schedule coordination for ongoing research projects, as well as, course projects. Responsible for the collection and analysis of data utilizing video analysis and force dynamography. Primary research topics include the biomechanical analysis of the lower extremities during human movement, in particular, the biomechanics of landing and the effects on the knee and ACL. Previous research topics include effects of in-flight perturbations during drop landings, biomechanical strategies utilized by individuals with multiple sclerosis, effects of ankle bracing during drop landings, differences between single- and double-leg drop landings, and effect of prosthetic stiffness in amputee walking and jogging.

Biomechanics Laboratory, University of Georgia, Athens, Georgia: 2001-2007

Biomechanics Laboratory Coordinator: Responsible for maintaining biomechanical equipment, inventory, and supplies, and coordinating schedules of all graduate biomechanics students, undergraduate research projects, biomechanics seminar and methodology courses, and biomechanics research meetings.

Research Assistant: Responsible for the initiation and implementation of research ideas, and the collection and analysis of data utilizing video analysis, force dynamography, and electromyography. Research topics include effects of in-flight perturbations during drop landings, effects of ankle instability during functional movements, biomechanical strategies utilized by individuals with multiple sclerosis, effects of ankle bracing during drop landings, differences between single- and double-leg drop landings, effect of prosthetic stiffness in amputee walking and jogging, and effect of femoral offset in total hip arthroplasty while transversing an obstacle.

Aging and Physical Performance Laboratory, University of Georgia, Athens, Georgia: 2002-2004

Research Assistant: Responsible for the collection of data utilizing the Continuous-Scale Physical Functional Performance (CS-PFP) test. Research topic included investigation of the effect of aerobic reserve on physical function in older adults.

Metabolism and Body Composition Laboratory, University of Georgia, Athens, Georgia: 2001

Research Assistant: Responsible for the collection of data utilizing a metabolic cart and blood analysis. Research topic included investigation of the effects of carbohydrate intake on performance after prolonged exercise.
