

***The Randall Harper Award  
for Outstanding Undergraduate Research  
in Physics and Astronomy***

---

The WKU Department of Physics and Astronomy is pleased to invite applications for the “**Randall Harper Award for Outstanding Undergraduate Research**”. The successful applicant will receive a certificate and \$100 at the annual University Awards Ceremony.

At the time of the applications deadline, the candidate must:

- have completed or be currently enrolled in PHYS 321, and
- have given at least one presentation (oral or poster) as lead/primary author of his/her research work to a university-wide, state-wide, or national conference.

A complete application will consist of providing identifying information, a list of published and/or presented research work (author list, title, bibliographic details of publications and/or details of conference presentations), and a single page summary description of the research work being considered for this award.

An awards committee of faculty in the Department of Physics and Astronomy will judge all applications submitted by the deadline posted on the departmental website at <http://www.wku.edu/physics/resources.php>. The quality of the research, as described in the application, shall be based on originality, creativity, difficulty, and significance.

Direct any questions about this award to [Richard.Gelderman@wku.edu](mailto:Richard.Gelderman@wku.edu).
