

MISSION

The School of Engineering and Applied Sciences educates, engages, and empowers students to solve technological problems. We provide our graduates with knowledge and skills and serve our community stakeholders through applied research and professional activities.

Principle One: PRODUCE CAPABLE GRADUATES

We deliver high-quality, hands-on, and active learning education to a diverse student population. We make meaningful opportunities available to our students to learn and enrich their professional futures.

Principle Two: CONNECT THEORY AND PRACTICE

We provide an educational process that integrates theoretical and business practices, including professional and project-based experiences, for the purpose of acquiring relevant technological literacy.

Principle Three: COLLABORATE AND COMMUNICATE

We cooperatively engage in research and education to serve our constituent communities. We contribute through relevant research, services and activities, with dissemination of knowledge.

Principle Four: RESPECT AND VALUE

We value all WKU employees and treat them as partners to deliver personalized advising and teaching, along with other professional services.

Principle Five: STEWARD OF RESOURCES

We make every effort to use our resources effectively and seek ways to better serve our current and future constituents.

Principle Six: PRACTICE CONTINUOUS IMPROVEMENT

We constantly endeavor to assess and improve our School, to never be satisfied with the current condition, and to focus on ways to better serve our constituents.
